About

Microsoft 365 consultant specialising in Intune and Entra ID. I help organisations migrate to Microsoft 365 and strengthen existing environments, with a focus on device management, Autopilot, application deployment, security policies and Conditional Access.

Most of my work is in Intune: building Autopilot deployments, packaging and deploying applications, and locking devices down with compliance policies, Windows Hello for Business and AppLocker. I often take organisations from on-premises Active Directory and SCCM to cloud-only management, and my background in Windows Server helps me plan those moves without surprises.

Experience

Since 2023 — Innofactor

Technical Consultant

Microsoft 365 and Modern Workplace consultant, focused on Intune, Entra ID and client management. Design, implementation and operation of client platforms and security solutions.

- Microsoft 365 rollouts and migrations: Intune, Autopilot, Conditional Access, Windows 365
- Migrations from Google Workspace to Microsoft 365
- Application deployment, client security, Windows Hello for Business
- Specialist support in larger customer environments

2018-2023 — Gibon, Stockholm

Technical Consultant

- Migrated customer environments to Microsoft 365 with Autopilot, Endpoint Manager and Conditional Access
- Clients, networks, servers, secure printing, Microsoft Office and customer-specific applications
- Project and sub-project lead for new and existing customers
- Senior service desk resource for escalated cases, and trained service desk staff

2015-2018 — Gibon, Stockholm

Service Desk and On-site Technician

1st and 2nd line support following ITIL. On-site support and installation of clients, networks and servers at contract customers.

Selected projects

2026 — Migration

Google Workspace to Microsoft 365

Mail and file migration, Autopilot and Intune setup, Entra ID configuration. Project lead and hands-on.

`Exchange Online` `Autopilot` `Intune` `Entra ID`

2025-2026 — Cloud PC

Windows 365 for external partners

Responsible for deploying Cloud PCs with VPN access for a property company's partners.

`Windows 365` `Intune` `Entra ID` `Conditional Access` `Azure networking`

2025 — Endpoint

AD and SCCM to Intune, plus Conditional Access

Led the Intune implementation: policies, app packaging and customisation. Set up Conditional Access and helped review the existing Entra ID directory.

`Intune (cloud and hybrid)` `Entra ID` `Conditional Access`

2025	Identity	
	Windows Hello for Business	
	Rollout for 300 users, starting with a pilot group.	
	Intune Entra ID	
2025	Security	
	AppLocker through Intune	
	Locked down student computers so only approved applications can run.	
	AppLocker Intune
